DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on December 19, 2002 was filed in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner. The reference BC on page 1, which is a duplicate of reference BB, is a search report for WO 98/23777. This reference was considered but will not be printed.

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the mailing address of each inventor. A mailing address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing address should include the ZIP Code designation. The mailing address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76.

Allowable Subject Matter

3. Claims 1-50 are allowed.

4. The following is an examiner's statement of reasons for allowance: Applicants' invention is a method of detecting apoptotic cells in a cellular sample by contacting the sample with a solution comprising a topoisomerase I molecule and a nucleic acid molecule which is cleavable by topoisomerase I molecule and ligatable to a 5' OH, and detecting the nucleic acid molecule ligated to the 5'OH of the DNA in the cellular sample.

The closest prior art reference, Didenko et al. (Biotechniques, vol. 27, pp. 1130-1132, 1999 ; cited in the IDS), teach detection of apoptosis in cells by ligating a double-stranded hairpin probe to double stranded breaks in cellular DNA using T4 DNA ligase, but they do not teach or suggest

Art Unit: 1637

using topoisomerase I (page 1130, last paragraph; page 1131). Shuman (J. Biol. Chem., vol. 269, pp. 32678-32684, 1994; cited in the IDS) teaches using topoisomerase I to clone DNA fragments into vectors, but does not teach or suggest using topoisomerase I to detect apoptotic cells.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa E Strzelecka whose telephone number is (571) 272-0789. The examiner can normally be reached on M-F (8:30-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on (571) 272-0782. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
